SUMMARY

Full Stack Developer with hands on production experience building and shipping cross-platform SaaS applications used by real users. Skilled in architecting scalable systems from UI to deployment, with deep expertise in backend engineering, payment integrations, real-time scheduling, and CI/CD workflows. Passionate about writing clean, maintainable code that solves real problems at scale.

EDUCATION

Kongu Engineering College <i>B.Tech – Information Technology</i> CGPA: 7.02	2022 – 2026 <i>Erode</i>
Sakthi Institute of Technology <i>Diploma in Engineering</i> Percentage: 85%	2019 – 2022 <i>Erode</i>
SVV Hr. Sec. School <i>HSLC</i> Percentage: 86%	2018 – 2019 <i>Erode</i>

WORK EXPERIENCE

Harvee Designs <i>Full Stack Developer</i>	Coimbatore, Tamil Nadu <i>Dec 2025 – Present</i>
Karpavar karpavar.com - Shipping Karpavar, a school management SaaS serving educational institutions, building end-to-end web, mobile, and backend features. - Built Razorpay payment integration with HMAC verification, partial payment logic, and automated invoicing, increasing payment collection by 25%. - Automated fee reminders and admission notifications using APScheduler and FastAPI BackgroundTasks, reducing manual work by 40% per school. - Implemented JWT-based deep-link authentication, enabling one-click navigation from email/SMS links directly to the relevant app screens and reducing login friction. - Deployed on Hetzner VPS with Docker, GitHub Actions CI/CD pipelines, Nginx, Redis caching, and PostgreSQL, achieving 90% uptime. - Optimized database queries and API performance, reducing response times by 60%.	

PROJECTS

Athena <i>Node.js, CLI, AI</i> Open Source GitHub - Open-source CLI that turns codebases into AI-readable project knowledge, reducing hallucinations during AI-assisted development. - Designed to keep project analysis local and secure, generating structured project context for AI coding workflows. - GitHub: github.com/Sabari-Vasan-SM/athena Website: athena.sabari.me npm: project-athena	
QuickClix <i>React, Flutter, Node.js</i> quickclix.vasan.tech GitHub - Cross-platform universal clipboard app enabling seamless text and file sharing between web and Android via PIN-based session management. - Built with a unified Node.js backend serving both a React web client and a Flutter Android app simultaneously.	
Bike Buddy <i>React, Express, MongoDB, Nodemailer</i> Live GitHub - Full-stack bike service management app with role-based dashboards for customers and service shop owners. - Features real-time job status updates and automated email notifications using Nodemailer with SMTP configuration.	

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Dart

Frontend: React, Next.js, Flutter

Backend: FastAPI, Node.js, Express

Databases: MongoDB, PostgreSQL, Supabase, Redis

DevOps & Infrastructure: Docker, GitHub Actions, Nginx, Linux, Message queues

Tools: Git, GitHub, Postman, Miro, Canva

AI Tools: GitHub Copilot, Cursor, Claude Code

CERTIFICATIONS

- MongoDB Associate Developer Certification
- AWS Essentials Certification
- Flutter Masterclass – Complete Guide to App Development
- React.js Beginner to Expert
- Prompt Engineering for Developers
- Anthropic Certification – AI Fundamentals, Prompt Engineering & MCPs
- Gemini Certified Student – Certified by Google for Education for Google AI applications.
- Agile Fundamentals by GUVI
- Foundations of Git by GitKraken

ACHIEVEMENTS

- **Athena** – Built and open-sourced a CLI that converts codebases into structured, AI-readable project knowledge for reliable AI-assisted development. [Website]
- **vasX UI** – Published a reusable Flutter UI component library on pub.dev, providing production-ready widgets for forms, tables, dropdowns, navigation, and responsive interfaces. [pub.dev]
- Selected for **Smart India Hackathon (SIH)** – National-level government hackathon
- **2nd Prize Winner** – 30-Hour Hackathon at Kongu Engineering College
