SUMMARY

Full Stack Developer with hands on production experience building and shipping cross-platform SaaS applications used by real users. Skilled in architecting scalable systems from UI to deployment, with deep expertise in backend engineering, payment integrations, real-time scheduling, and CI/CD workflows. Passionate about writing clean, maintainable code that solves real problems at scale.

EDUCATION

Kongu Engineering College <i>B.Tech – Information Technology</i> CGPA: 7.02	Erode, Tamil Nadu 2022 – 2026
Sakthi Institute of Technology <i>Diploma in Engineering</i> Percentage: 85%	Tamil Nadu 2019 – 2022
SVV Hr. Sec. School <i>HSLC</i> Percentage: 86%	Tamil Nadu 2018 – 2019

WORK EXPERIENCE

Harvee Technologies <i>Full Stack Developer Intern</i>	Coimbatore, Tamil Nadu Dec 2025 – Present
- Developed and shipped end-to-end features for a live school management SaaS product serving real users across web and mobile platforms. - Built a Razorpay payment integration with HMAC signature verification, handling partial and waterfall payment logic for fee management. - Implemented automated fee reminder scheduling using APScheduler and FastAPI BackgroundTasks with email notification templates. - Designed a deep-link JWT authentication flow enabling users to navigate directly from email payment links to protected app screens post-login. - Managed Docker-based deployment on a Hetzner VPS with GitHub Actions CI/CD pipelines and Nginx as a reverse proxy. - Integrated Redis for session caching and PostgreSQL for relational data modelling across the school management domain.	

PROJECTS

Billventory <i>React, Node.js, Supabase</i> billventory.vasan.tech GitHub - Retail management platform integrating inventory tracking, billing, and sales analytics into a unified dashboard. - Implemented real-time data sync with Supabase and multi-user role-based access for shop owners and staff.
Bike Buddy <i>React, Express, MongoDB, Nodemailer</i> Live GitHub - Full-stack bike service management app with role-based dashboards for customers and service shop owners. - Features real-time job status updates and automated email notifications using Nodemailer with SMTP configuration.
QuickClix <i>React, Flutter, Node.js</i> quickclix.vasan.tech GitHub - Cross-platform universal clipboard app enabling seamless text and file sharing between web and Android via PIN-based session management. - Built with a unified Node.js backend serving both a React web client and a Flutter Android app simultaneously.

TECHNICAL SKILLS

Languages: Python, JavaScript, Dart

Frontend: HTML, CSS, React, Next.js, Flutter

State Management: BLoC, Riverpod, Redux

Backend: Node.js, Express, FastAPI

Databases: MongoDB, PostgreSQL, Supabase, Redis

DevOps & Infrastructure: Docker, GitHub Actions, Nginx, Linux (VPS)

Tools: Git, GitHub, Postman, Miro, Canva

AI Tools: GitHub Copilot, Cursor, Claude Code

CERTIFICATIONS

- MongoDB Associate Developer Certification
- AWS Essentials Certification
- Flutter Masterclass – Complete Guide to App Development
- React.js Beginner to Expert
- Prompt Engineering for Developers
- Anthropic Certification — AI Fundamentals, Prompt Engineering & MCPs
- Gemini Certified Student – Certified by Google for Education for Google AI applications.
- Agile Fundamentals by GUVI
- Foundations of Git by GitKraken

ACHIEVEMENTS

- Selected for **Smart India Hackathon (SIH)** – National-level government hackathon
- **2nd Prize Winner** – 30-Hour Hackathon at Kongu Engineering College
